1. Product Overview and Features

1.1. Product Overview

NICEPAY Payment Solution is a product of PT IONPAY NETWORKS that provide various electronic payment over the Internet safely without separate security device. NICEPAY have integrate with Banks host to host connection for better and faster performance. Using latest technology, NICEPAY confidence to grow your business together.

1.2. Integration Process

- 1. Understanding SDK, Parameters and Payment Flow
- 2. Explore API Operation Calls
- 3. Integration
- 4. Implementation Test (Development Environment)
- 5. Request Production MID and API Key
- 6. Go Live

1.3. Prerequisites

- 1. Test MID
- 2. Test API Key
- 3. NICEPAY Professional PHP SDK
- 4. Customer Journey http://template.nicepay.co.id

1.4. Inquiry

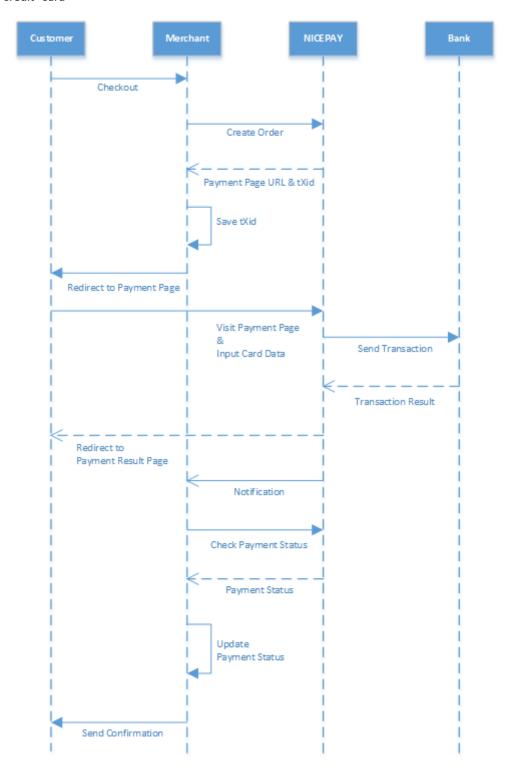

Have any inquiry? Please contact us: it.support@ionpay.net

• Cart Data Parameter for Payment (Credit Card)

Parameter	Description
count	Total card data count
item	Array of object
Item -> img_url	good's image URL (image size 50*50)
Item -> goods_name	goods name
Item -> goods_detail	goods detail
Item -> goods_amt	goods amt

Example:

JSON of cartData

```
1. {
2.
      "count": "2",
      "item": [
3.
4.
5.
          "img_url": "http://img.aaa.com/ima1.jpg",
6.
          "goods_name": "Item 1 Name",
7.
          "goods_detail": "Item 1 Detail",
          "goods_amt": "700"
8.
9.
        },
10.
          "img_url": "http://img.aaa.com/ima2.jpg",
11.
12.
          "goods_name": "Item 2 Name",
13.
          "goods_detail": "Item 2 Detail",
          "goods_amt": "300"
14.
15.
        }
16.
17. }
```
